

# Appointment Scheduling

Recently, our office has implemented new guidelines for appointments scheduled by phone.

Please review the following steps when dialing 863-533-7151 to schedule your next appointment:

1. You will hear a menu of various options when you make your call. If you select the option to schedule an appointment, you will be directed to a dedicated scheduling staff member who can assist you in scheduling your next appointment.
2. You will also be given the option of connecting directly to the office nurse if you require more specific information, or if your medical needs are more urgent.
3. Finally, you may choose to refill your prescriptions using the new phone menu. Once you've selected this option and shared the requested information, your refill will be honored within 48 hours and no further follow up will be necessary. Our office will follow-up with you only if an issue arises with your prescription, or if we require an in-office appointment prior to prescribing your medication. Please note that you may also request a prescription refill online by visiting **[www.WatsonClinic.com](http://www.WatsonClinic.com)** and choosing the 'Prescription Refill Request' option from the menu on the left side of the page.

This new phone menu service has been implemented to offer you a greater level of efficiency and convenience.

# Watson Clinic is proud to call **Bartow** home!

Call today to schedule an appointment with our experienced team of medical practitioners. Walk-ins welcome.
