Leading *the way in* cancer *Care*

Watson Clinic opened a stand-alone cancer center in 2003 to redefine the caliber of cancer care in our community. We're proud to offer the most diverse and experienced team of cancer specialists in the area, along with the latest technologies and cutting edge research, making our Center a safe haven for patients, families and caregivers.

It began with a singular goal
of providing the very best
**cancer care
& resources,**
right here in Lakeland.

For more than a decade, Watson Clinic has built an indelible legacy that furthers the cause of cancer survivorship, and we strive to continue delivering the breakthrough treatments and technologies that will bring hope for generations to come.

As one of an elite group of freestanding cancer centers across the nation to be accredited by the American College of Surgeons' Commission on Cancer, and Polk County's only member of the Moffitt Oncology Network, Watson Clinic employs a multidisciplinary approach where our team of oncologists, radiologists and surgeons join together with their fellow cancer experts to personalize treatment plans for each patient.

Our team works as one through every step of the treatment process – from diagnosis to recovery. We have dedicated support staff and a myriad of programs designed to support patients on the road to survivorship.

For more information, call the cancer specialists where expertise, compassion and hope thrive.
