

Delivering the Personalized Services You Expect

Watson Clinic's OB-GYN department features a team of highly experienced specialists, both male and female providers, convenient Lakeland and Bartow locations, and a complete roster of women's health services including routine gynecologic care, high-risk pregnancy care and complex surgical capabilities. Patients are active participants in their own care, and referrals for screenings are provided as needed for laboratory services, bone density scans and the latest 3D mammography.

General Gynecology - Watson Clinic provides exceptional gynecologic care for every phase of a woman's life. We offer a complete range of services including annual evaluations, menstrual irregularity treatments, contraceptive modalities, minor in-office procedures, ultrasound evaluations, as well as highly advanced vaginal, laparoscopic and robotic surgical procedures.

Obstetrics & Delivery Coverage - For expectant mothers-to-be, our obstetricians are among the most recognized and accomplished in Central Florida. Our department provides services ranging from prenatal counseling to complete pregnancy care and everything in between, including genetic testing, the latest in 4D/3D ultrasound imaging, and effective management of the highest-risk pregnancies. Our team works closely together to ensure a warm and attentive continuity of care for each patient. We also offer a multitude of pregnancy, childbirth and newborn education classes and expert lactation consultants.

Urogynecology and Reconstructive Pelvic Surgery - For women experiencing pelvic pain, urinary incontinence, fecal incontinence and pelvic organ prolapse, our Urogynecology and Reconstructive Pelvic Surgery program offers the latest evaluation and treatment options available. From lifestyle and dietary modifications, pessary

management, pelvic floor physical therapy, sacral neuromodulation, in-office surgeries and pelvic reconstructive efforts, our program will tailor an individualized treatment plan just for you.

Reproductive Endocrinology and Fertility - When certain health disorders and fertility issues hinder women from participating in the miracle of new life creation, Watson Clinic provides expert and compassionate consultation, evaluation and treatment options right here in Polk County. Our team offers consultative IVF services at the Bella Vista Building with a physician on staff at the nationally recognized Center for Reproductive Medicine to expand the breadth and availability of these services even further.

Gynecologic Oncology - Working closely with the OB-GYN team, gynecologic oncologists Dr. Richard J. Cardosi and Dr. Logan Blankenship diagnose and treat all cancers of the female reproductive system. Dr. Cardosi, a nationally recognized expert in robotic techniques, utilizes this in over 70% of his surgical procedures.
