

NAPBC

NATIONAL ACCREDITATION PROGRAM FOR BREAST CENTERS

Raising the Standard in Breast Healthcare

Just ask the experts.

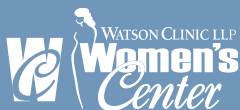

Watson Clinic is working hard to detect, treat and eliminate breast cancer in our community. **And now, the experts have taken notice.**

Our Women's Center was recognized by the National Accreditation Program for Breast Centers (NAPBC), an organization dedicated to the improvement of quality care for patients with breast disease.

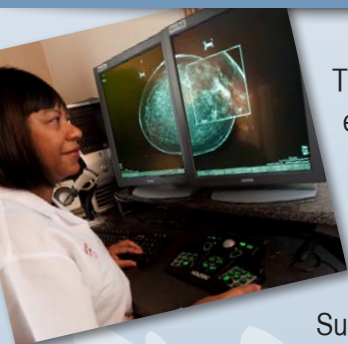

When compared to the best of the best, we met all 27 quality standards with absolutely no deficiencies – making us one of a select group of centers in Florida to achieve full accreditation.

NAPBC

NATIONAL ACCREDITATION PROGRAM FOR BREAST CENTERS

The accredited Women's Center encompasses two "suites" with a dedicated professional staff offering mammography, breast surgery, and plastic & reconstruction services.

Suite A houses a comprehensive breast imaging department where a team of fellowship-trained radiologists and medical support staff utilize digital mammography technology and offer patients state-of-the-art care. Suite B offers breast surgery consultation and plastic surgery services.

The NAPBC agrees that Watson Clinic elevates the standards of breast healthcare right here in Polk County. Patients have access to a broad range of Watson Clinic specialists, patient education programs and support groups, and they're guided every step of the way by nurse navigators.

For more information about the NAPBC accreditation, visit AccreditedBreastCenters.org.

To schedule a mammogram at the Women's Center, call 863-680-7755, option 3.
