

## *Behavioral Health Services at Watson Clinic*

Watson Clinic is committed to nurturing the total wellness of our patients, expertly treating conditions that affect both their physical and mental wellbeing. We understand that a person's health can be impacted by stress and anxiety, or a number of other factors may require that they seek the services of an expert.

Mental health conditions are extremely common and are a risk to a patient's overall health and wellness if left untreated. More and more people are turning to the field of psychiatry for the treatment of these conditions and to improve their overall quality of life. Psychiatry involves the diagnosis, treatment and prevention of mental, emotional and behavioral illnesses.

At our Main Clinic location, board-certified psychiatrist **Daniel Weinberg, MD**, offers comprehensive adult psychiatric services for patients aged 18 and older, including treatment for mild to severe depression, stress, anxiety, and additional mental and behavioral disorders. Psychiatrists are specially trained physicians who employ a variety of medical and therapeutic treatments to inspire the best outcomes for their patients.
