

When should females first visit an OB/GYN specialist?

The American College of Obstetrics and Gynecology recommends an initial visit to a gynecologist between 13 to 15 years of age.

Receiving a gynecologic consultation and care at this age establishes an open line of communication concerning crucial women's health issues, and can provide valuable information that can positively impact the patient's wellness as she continues to mature.

Watson Clinic obstetrician and gynecologist, **Diana L. Wilson, MD**, is pleased to offer expert adolescent and teen gynecologic healthcare from our Main Clinic location.

Dr. Wilson provides a broad range of OB/GYN services to the younger females in our community, including routine examinations, health education, contraception counseling, STD screening and follow-up, and the evaluation and treatment of common infections.

In addition, Dr. Wilson also delivers comprehensive obstetrics and gynecologic care tailored for adult female patients.

To schedule a consultation with Dr. Wilson, please call 863-680-7243.
