Armed with the latest technologies, years of intensive training, and a wealth of experience, the expert team at the Watson Clinic Center for Specialized Rehabilitation can help you restore mobility and function in the wake of illness or injury.

For more information and to schedule an appointment, call 863-607-3699 or visit www.WatsonClinic.com/CSR.

Injuries, chronic conditions or everyday wear and tear can often impact our ability to perform even the simplest tasks. The Watson Clinic Center for Specialized Rehabilitation can help you move forward with recovery and reclaim a more productive quality of life.
Led by a team of highly trained specialists, the facility features a host of services and technologies including:

- Diverse staff with board-certifications in Orthopaedics and Athletic Training
- One of the area’s only certified hand specialists who offers therapy options for patients who have suffered injuries or other demobilizing conditions.
- Vestibular specialists who help patients recover from chronic imbalance and dizziness.
- A state-of-the-art HUMAC balance system, the world’s most powerful tool in restoring a sense of stability and coordination.
- Physical conditioning and occupational therapies allow patients to perform everyday tasks with maximum agility and effectiveness.
- Swift referrals to additional Watson Clinic specialty physicians.
