

# NUTRITION EDUCATION

## WHAT IS A REGISTERED DIETITIAN?

Registered dietitians (RD) are your most reliable source of nutrition information. Look for the initials RD behind a person's name as this means the practitioner has:

- Completed a Bachelor's, Master's or Doctorate degree in nutrition
- Passed a national exam
- Maintains continuing education hours

Registered dietitians are trained in the science of nutrition to help patients achieve their health and fitness goals.

## WHEN WAS YOUR LAST NUTRITION CHECK-UP?

Registered dietitians treat both children and adults for obesity, diabetes and a variety of additional nutrition-related conditions. They draw on their experience to develop a personalized nutrition plan, and are able to separate facts from fads and translate nutritional science into information you can use. A registered dietitian can put you on the path to lowering weight, eating healthfully and reducing your risk of chronic disease.
