

WATSON CLINIC<sub>LLP</sub>

Your  
**Home**  
for Quality  
Healthcare

**For over 80 years, generations of patients have trusted Watson Clinic to help them stay healthy through every phase of life.** No matter their age or wellness need, our patients know that we provide a one-stop healthcare experience unlike any other.

**One of the nation's top patient advocacy groups – the National Committee for Quality Assurance – bestowed their coveted status of Patient-Centered Medical Home to the following six Watson Clinic locations:**

- **Main**
- **South**
- **Highlands**
- **North Pediatrics**
- **Bartow Family Medicine**
- **Plant City**

The primary care and pediatric departments at each of these locations were required to meet or exceed a series of strict quality standards.

## Here's what it means to be recognized as a Patient-Centered Medical Home:

- **Our Primary Care and Pediatric specialists set the groundwork:** A lifetime of good health begins with a physician or provider from our primary care or pediatric departments. These specialists can serve as trusted guides through every step of your healthcare journey - from offering routine screenings and immunizations to providing easy referrals to more specialized care as needed.
- **It continues with convenience of care:** Maintaining a high quality of care is only meaningful if patients can easily access it. With multiple locations conveniently situated across every corner of our community, there's sure to be a Watson Clinic facility close to your home. Clinic physicians and providers are also available on-call and around the clock at local hospitals to offer emergency care.
- **Electronic Medical Records empower a smooth continuity of care:** The platform makes your medical records easily accessible to you and every medical professional you see at Watson Clinic, and even other physicians you may counsel outside of our community. That means more time addressing your specific needs, and less time playing catch up with your medical history.
- **Through our MyChart Patient Portal system,** you can easily communicate with your doctor's office, request appointments and prescription refills, view lab results, and much more.

*When you're committed  
to your patients, it shows.*
