Many times, an illness or injury might not be severe enough to require emergency care, or warrant the high fees associated with an emergency room visit. Then again, it might not be able to wait for a regularly scheduled appointment with your physician either.

That’s when Priority Care Highlands can come to the rescue. Headed by board-certified family medicine physician Dr. David Remmer and his highly trained care team, the department offers same day and next day appointments for new and established patients ages 2 and up.

They provide treatments for a variety of non-emergency conditions including:

- Bladder infections
- Cold & flu
- College/camp physicals
- DOT physicals
- Earaches & sore throats
- ER follow-up
- Respiratory tract infections
- Sprains, strains & other non-life threatening physical injuries
- Urinary tract infections

Priority Care Highlands delivers fast, effective healthcare that works with your schedule. You can even choose your own appointment dates and times, as well as a Telemedicine appointment through the MyChart at Watson Clinic patient portal. In addition, patients benefit from quick and convenient access to x-ray, laboratory and additional medical support tools as needed.
Board-certified family medicine specialist

DR. DAVID J. REMMER

is pleased to offer same day and next day appointment availability from the Priority Care department at Watson Clinic Highlands.
