

Help prevent

# Zika.

## Mosquito prevention is key to stopping the spread of diseases.

### Drain Standing Water.

**Drain:** Garbage cans, house gutters, pool covers, coolers, toys, flower pots or any other containers where sprinkler or rain water has collected.

**Discard:** Old tires, drums, bottles, cans, pots and pans, broken appliances and other items that aren't being used.

**Empty & Clean:** Birdbaths and pets' water bowls at least once or twice a week.

**Protect:** Boats and vehicles from rain with tarps that don't accumulate water.

**Maintain:** The water balance (pool chemistry) of swimming pools. Empty plastic swimming pools when not in use.

### Cover Your Skin.

**Clothing:** If you must be outside when mosquitoes are active, cover up. Wear shoes, socks, long pants, and long sleeves.

**Repellent:** Apply mosquito repellent to bare skin and clothing. Always use repellents according to the label. Repellents with DEET, picaridin, oil of lemon eucalyptus, and IR3535 are effective. Use mosquito netting to protect children younger than 2 months.

**Cover doors and windows with screens.** Keep mosquitoes out of your house. Repair broken screens on windows, doors, porches, and patios.
