LEADING THE WAY IN CANCER CARE

Watson Clinic opened a stand-alone cancer center in 2003 to redefine the caliber of cancer care in our community. We're proud to offer the most diverse and experienced team of cancer specialists in the area, along with the latest technologies and cutting edge research, making our cancer center a safe haven for patients, families and caregivers.

It began with a singular goal of providing the very best **cancer care & resources**, right here in **Lakeland**.

By delivering the breakthrough treatments and technologies that will bring hope for generations to come, Watson Clinic has built an indelible legacy that furthers the cause of cancer survivorship in our community and far beyond.

Our Cancer Center employs a collaborative approach where our team of oncologists, radiologists and surgeons join together with other cancer experts to personalize treatment plans for each patient.

Our team works as one through every step of the treatment process – from diagnosis to recovery. We have dedicated support staff and a myriad of programs designed to support patients on the road to survivorship.

In addition, we're fully accredited by the Accreditation Association for Ambulatory Healthcare, Inc. (AAAHC) and the American College of Radiology.
