

STATE-OF-THE-ART IMAGING SERVICES.

Sometimes doctors need to see inside the body to help diagnose or treat diseases. Often they can accomplish this without surgery — thanks to radiology technology.

The **Radiology** department at **Watson Clinic Highlands** offers cutting-edge imaging services that detect disease and other chronic conditions with a greater level of clarity and patient safety than ever before. The images they produce are read and interpreted by a stellar team of fellowship-trained radiology specialists.

Fully accredited by the American College of Radiology, the department houses a fleet of the most advanced imaging systems available, many of which we introduced to the community for the first time, including:

- **High-field MRI magnet, including open-bore systems for obese or claustrophobic patients**
- **Multi-slice CT unit, the Optima**
- **Coronary CT angiography**
- **3D mammography**
- **Multiple ultrasound units**

The efforts of our Radiology department lead to more informed and successful plans of treatment.

CONVENIENT LAB SERVICES. FAST RESULTS.

Watson Clinic offers hassle-free access to laboratory services for patients with doctor-approved testing referrals.

The **laboratory** at **Watson Clinic Highlands** is one of the most advanced in the area, featuring fast and efficient service, a team of highly trained professionals, and a host of services including blood draws and specimen collections.

Laboratory services include chemistry, hematology, histology, microbiology and serology. The majority of tests can be completed from this lab location, which allows patient added convenience and expedited service.

Many results are completed within 24 hours, and are usually made available to you through the online patient portal, that you can access from the comfort of your own home or smart phone.

The lab accepts patients on a walk-in basis who are served in the order in which they arrive. Appointments may also be scheduled in advance for even faster service.

The lab is proud to be fully accredited by the College of American Pathologists and certified by the Clinical Laboratory Improvement Amendments program.
