

MOSQUITOES

CAN SPREAD MALARIA

MALARIA is spread by mosquito bites, not person to person.

Symptoms of Malaria

Fever Chills Nausea Body Aches Headache

Protect Yourself

Spray
yourself with
mosquito repellent.

Cover
your arms and legs with
long clothing.

Drain
standing
water.

Around Buildings

At least once a week,
empty or cover
anything that could
hold water, such as:

- Buckets
- Toys
- Child Pools and Pool Covers
- Birdbaths
- Trash, Containers, and Recycling Bins
- Boat or Car Covers
- Roof Gutters
- Coolers
- Pet Dishes
- Tires

Stop Mosquitoes from Breeding

Mosquitoes can live indoors and will bite at any time, day or night.

Mosquitoes breed by
laying eggs in and near
standing water.

As little as one teaspoon
or bottle cap of water
standing for more than
one week is enough for
mosquitoes to breed
and multiply.

Keep them Outside

Use Air Conditioning

Keep Screens on All Windows

Repair Holes in Screens
