

## Surgical Areas Of Expertise Include:

- Total joint replacements for the hip, knee, shoulder, ankle and additional joints
- Total joint reconstruction
- Partial joint replacements
- Joint resurfacing
- Ligament reconstruction
- Arthroscopic procedures
- Fracture repair
- Cartilage injury repair
- Rotator cuff repair
- Hand Surgery
- Podiatric (foot) surgery

## Nonsurgical Care

As surgery is reserved as an option of last resort, our specialists work with patients to utilize a range of nonsurgical interventions, including anti-inflammatory medications and joint injections/aspirations.

When additional care is needed as a supplement or alternative to surgery, the department offers highly trained specialists in physical therapy, occupational therapy, and chiropractic medicine.

In the field of sports medicine, our physicians, physician assistants, physical therapists and athletic trainers work with local high school, college and professional sports teams to provide pre-season physicals, guidance on injury prevention, and fast-track access when injury occurs.
