

Your **Home** for Quality **Healthcare**

For close to 80 years, generations of patients have become part of the Watson Clinic family.

We pride ourselves in offering a complete healthcare experience – no matter your age or wellness needs, our family of specialists are here to serve you.

That's why each of these Watson Clinic locations have been recognized as a Patient Centered Medical Home.

- **Main**
- **South**
- **Highlands**
- **North Pediatrics**
- **Bartow Family Medicine**
- **Plant City**

This distinction comes from the National Committee for Quality Assurance, one of the nation's top healthcare quality and patient advocacy groups.

Here's what it means to be recognized as a Patient-Centered Medical Home:

- **It all starts with your primary care provider.**

In addition to treating a wide range of conditions, they can offer fast referrals to over 220 additional Watson Clinic providers when more specialized care is needed. Your personal care team comes equipped with the latest technologies and treatments to address whatever ails you.

- **It continues with convenience of care.**

There's likely a Watson Clinic location close to your home. If you can't wait for a regularly scheduled appointment, your immediate healthcare needs can be treated at one of our walk-in care facilities. Watson Clinic specialists also work around the clock at local hospitals when emergency care is needed.

- **Electronic Medical Records follow our patients wherever they may go within the Clinic.**

This allows for a continuity of care, decreased time spent filling out paperwork, and more productive patient-physician communications.

- **Through our MyChart Patient Portal system,** we empower our patients with easy and instant access to their medical records, prescription refills and online appointment capabilities.

As a **Patient-Centered Medical Home**, we're demonstrating a commitment to cutting through the confusion and clutter, adding value to the care you receive, and creating a healthcare experience that's solely focused on the needs of the patient.

Watson Clinic welcomes you to our family.
