Improve the quality of your skin with cosmetic services.

We are pleased to offer the latest options for patients who wish to rejuvenate their skin, reduce the appearance of fine lines and wrinkles, and minimize scarring and pigmentation issues. **Please ask us if one of these cosmetic procedures is right for you.**

WATSON CLINIC

Dermatology at Sun City Center

BOTOX®, Dysport®, Jeuveau®

These neuromodulators temporarily improve the appearance of both moderate to severe frown lines between the brows, forehead, and crow's feet lines in adults.

Juvéderm®, Restylane®, RHA®

These dermal fillers are designed to lift and restore volume to the face, smooth lines and wrinkles, and plump lips. The results are natural and provide long-lasting benefits.

Sculptra®, Radiesse®

These are longer lasting collagen-based fillers used to reduce the appearance of lines and wrinkles, as well as acne scars. This treatment helps to restore volume loss and stimulate collagen production for natural results that last for years.

Kybella®

Kybella® is administered as a series of treatments to reduce the appearance of a "double chin and jowls" by permanently destroying fat cells and tightening the skin.

Clear + Brilliant™

Clear + Brilliant™ is a non-invasive and safe laser for all skin types with little to no downtime. A series of treatments can be used to improve texture, fine lines, brown spots, and melasma.

BBL® Heroic™

Sciton's Broadband Light is an Intense Pulsed Light (IPL) treatment for brown spots such as age spots, sun spots and freckles, as well as broken capillaries, hyperpigmentation and rosacea. Common areas of treatment include the face, chest, hands and arms. This is a noninvasive treatment with minimal downtime.

Contour TRL™

The Sciton's Contour TRL™ (Tunable Resurfacing Laser) is the most advanced resurfacing treatment designed to dramatically improve deep wrinkles, scars, and overall sun damage. This powerful device precisely removes layers of damaged skin to stimulate new collagen production and reveal healthier, smoother, and tighter skin.

Halo®

Sciton's Halo® is a hybrid fractional laser treatment that combines two types of lasers (ablative and non-ablative) to improve the skin's appearance. It targets both superficial and deep layers of the skin for more effective results with less downtime than traditional lasers.

CO₂RE™ Laser

The CO₂RE™ laser is an extremely versatile device that allows for the treatment of both superficial and deep skin layers simultaneously. This technology stimulates collagen production and provides dramatic results, including reversing the signs of sun damage, removing brown spots, softening the appearance of moderate to severe wrinkles and remodeling facial acne scars.
