

Have your symptoms not responded well to medication?

Sinus relief is here.

In-Office Balloon Sinuplasty

Balloon Sinuplasty safely and effectively dilates sinus openings, resulting in relief from painful symptoms.

HOW DOES IT WORK?

- A soft, flexible guidewire is inserted into the blocked sinus passages.
- The balloon is advanced over the guidewire and inflated to gently expand the sinus opening.
- The balloon is removed, leaving the sinus open.

BENEFITS OF IN-OFFICE BALLOON SINUPLASTY:

- **Minimally Invasive:** The technology uses small, soft, flexible devices introduced entirely through the nostrils, gently opening blocked sinuses.
- **Fast Recovery Time:** Some patients can return to normal activities within 24 hours.
- **Familiar Setting:** The procedure can be performed from the comfort of our office.
