

Treating Foot and Ankle Injuries & Disorders

We rely on our feet to keep us mobile, active and productive. That's why our quality of life can suffer significantly when we're struck by pain or other dysfunctions in our feet or ankles.

Watson Clinic's board-certified podiatric surgeons offer a wide array of noninvasive and surgical treatments for foot conditions related to:

- fractures
- foot and ankle injuries
- deformities
- osteoarthritis
- infection
- wound care
- soft tissue and bone tumors

Our podiatrists also provide comprehensive wound care, as well as surgical solutions when traditional treatments are no longer viable.
